SUPPLEMENTARY INFORMATION: ONMS serves as the trustee for a network of underwater parks encompassing more than 600,000 square miles of marine and Great Lakes waters from Washington

National marine sanctuaries protect our nation's most vital coastal and marine natural and cultural resources, and through active research, management, and public engagement, sustain healthy environments that are the foundation for thriving communities and stable economies. One of the many ways ONMS ensures public participation in the designation and management of national marine sanctuaries is through the formation of advisory councils. The Sanctuary System Business Advisory Council (council) has been formed to provide advice and recommendations to the Director regarding the relationship of ONMS with the business community. Additional information on the council can be found at <http://sanctuaries.noaa.gov/management/ac/welcome.html>.

Matters to be Considered: The meeting will provide an opportunity for council members to hear news from across the National Marine Sanctuary System and review and comment on program initiatives. SUPPLEMENTARY INFORMATION:

I. Abstract

The United States Patent and Trademark Office (USPTO) surveys international and domestic participants of the USPTO's Global Intellectual Property Academy (GIPA) training programs to obtain feedback from the participants on the effectiveness of the various services provided to them in the training programs. GIPA was established in 2006 to offer training programs on the enforcement of intellectual property rights, patents, trademarks, and copyright. The training programs offered by GIPA are designed to meet the specific needs of foreign government officials (including judges; prosecutors; police; customs officials; patent, trademark, and copyright officials; and policy makers) concerning various intellectual property topics, such as global intellectual property rights protection, enforcement, and strategies to handle the protection and enforcement issues in their respective countries.

This collection contains three surveys directed to separate audiences: Pre-program, post-program, and alumni. The pre-program survey is designed to obtain the background and experience of a participant and is delivered to the participant prior to their arrival for a GIPA training program. The post-program survey is used to analyze the overall effectiveness of the program and is conducted at the conclusion of the training program. The alumni survey is used to determine the value of the GIPA
