The Proposal

The FAA is considering an amendment to 14 CFR part 71 to revoke the existing Class E airspace area at Lafayette, Aretz Airport, IN. All instrument approach procedures for the Aretz Airport have been canceled in preparation for the closure of the airport. Controlled airspace extending upward from 700 to 1200 feet AGL is no longer needed to contain aircraft executing instrument procedures. The area would be removed from the appropriate aeronautical charts. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9F dated September 10, 1998, and effective September 16, 1998, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant new rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9F, Airspace Designations and Reporting Points, dated September 10, 1998, and effective September 16, 1998, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

Initiation of Review of Management Plan/Regulations of the Channel Islands National Marine Sanctuary; Intent To Prepare a Draft Environmental Impact Statement and Management Plan; Scoping Meetings

AGENCY: Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration, Department of Commerce (DOC).

ACTION: Initiation of review of management plan/regulations; intent to prepare environmental impact statement; scoping meetings.

SUMMARY: The Channel Islands National Marine Sanctuary (CINMS or Sanctuary) was designated in September 1980, and consists of 1,252 square nautical miles of open ocean and near shore habitat approximately 25 miles off the coast of Santa Barbara, California, encompassing the waters surrounding San Miguel, Santa Rosa, Santa Cruz, Anacapa and Santa Barbara Islands from mean high tide to six nautical miles offshore. The present management plan for the Sanctuary was completed in 1982. In accordance with Section 304(e) of the National Marine Sanctuaries Act, as amended, (NMSA) (16 U.S.C. 1431 et seq.), the Marine Sanctuaries Division (MSD) of the National Oceanic and Atmospheric Administration (NOAA) is initiating a review of the management plan, to evaluate substantive progress toward implementing the goals for the Sanctuary, and to make revisions to the plan and regulations as necessary to fulfill the purposes and policies of the NMSA.

The proposed revised management plan will likely involve changes to existing policies and regulations of the Sanctuary, to address contemporary issues and challenges, and to better protect and manage the Sanctuary’s resources and qualities. The review process is composed of four major stages: information collection and characterization; preparation and
release of a draft management plan/environmental impact statement, and any proposed amendments to the regulations; public review and comment; preparation and release of a final management plan/environmental impact statement, and any final amendments to the regulations. NOAA anticipates completion of the revised management plan and concomitant documents will require approximately eighteen to twenty-four months. NOAA will conduct public scoping meetings to gather information and other comments from individuals, organizations, and government agencies on the scope, types and significance of issues related to the sanctuary's management plan and regulations. The scoping meetings are scheduled for the weeks of June 21 and July 5, 1999, as detailed below.

DATES: Written comments should be received on or before July 27, 1999.

Scoping meetings will be held:
(1) Monday, June 21, 1999, 6:30pm in Lompoc.
(2) Tuesday, June 22, 1999, 6:30pm in Santa Barbara.
(3) Wednesday, June 23, 1999, 6:30pm in Oxnard.
(4) Thursday, June 24, 1999, 6:30pm in Long Beach.
(5) Friday, June 25, 1999, 6:30pm in Ventura.
(6) Wednesday, July 14, 1999, 2:00pm in Washington, D.C.

If we receive no adverse comments, we will not take further action on this proposed rule. If we receive adverse comments, we will withdraw the direct final rule and it will not take effect. We will address all public comments in a subsequent final rule based on this proposed rule. We will not institute a second comment period on this action. Anyone interested in commenting on this action should do so at this time.

DATES: Comments must be received in writing by July 12, 1999.
