Students for Zero Waste Week is a school-driven, week-long campaign to reduce waste on school campuses and within local communities with the intention of moving towards zero waste.

Students for Zero Waste Week invites your school to take the [Zero Waste Week Challenge](#) at school, in your community and at home by:

- Replacing single-use plastic items (such as drink bottles, sandwich baggies, spork packs, etc.) with reusable alternatives
- Replacing plastic straws with paper straws or consider not using straws
- Stepping up recycling and composting efforts
- Replacing single use condiment packets with bulk dispensers
- Powering down computers and other electronic devices when not in use
- Refusing products containing microbeads
- And more!

The extent to which your school is involved is up to your school!

Use the hashtag #zerowasteweek on your social media posts!

Go Green. Think Blue.
